

Foi utilizado o aplicativo Zotero para auxiliar nas seleções dos artigos de forma manual, de acordo com cada fase. Neste repositório está uma cópia que pode ser importada como BibTex.

The screenshot shows the Zotero application interface. The left sidebar displays a hierarchical view of the user's library, with sections like 'Achados ACM', 'Achados Science Direct', 'Minhas publicações', and various exclusion categories. The main pane lists a large number of academic papers, each with a preview icon, title, type (e.g., 'Artigo de periódico'), year, and a small preview of the document content. The interface has a clean, modern design with dark mode selected.

Titúlo	Tipo do item	Ano
3 - When Things Go Wrong—Balancing Technology's Safety and Risk	Seção de livro	2012
3.06 - Disorders of Taste and Smell	Seção de livro	2020
5 - A History of the Present on Drugs: Opium, Heroin and Methamphetamine	Seção de livro	2020
7 - AI applications in prevalent diseases and disorders	Seção de livro	2021
43 - International Perspectives on Security in the Twenty-First Century	Seção de livro	2015
2022 AHA/ACC Key Data Elements and Definitions for Cardiovascular and Noncardiovascular Complications of COVID-19: A Report of the American College of Cardiolog...	Artigo de periódico	2022
A bug finder refined by a large set of open-source projects	Artigo de periódico	2019
A bug finder refined by a large set of open-source projects	Artigo de periódico	2019
A Cautionary Tale on Using Covid-19 Data for Machine Learning	Conferência	2021
A Cognitive-Behavioral Family-Based Protocol for the Primary Presentations of Avoidant/Restrictive Food Intake Disorder (ARFID): Case Examples and Clinical Research ...	Artigo de periódico	2022
A comprehensive evaluation of S2Z Variants through a developer-informed oracle	Artigo de periódico	2023
A comprehensive evaluation of S2Z Variants through a developer-informed oracle	Artigo de periódico	2023
A critical comparison on six static analysis tools: Detection, agreement, and precision	Artigo de periódico	2023
A critical comparison on six static analysis tools: Detection, agreement, and precision	Artigo de periódico	2023
A deep architecture for matching short texts	Conferência	2013
A deep learning based static taint analysis approach for IoT software vulnerability location	Artigo de periódico	2020
A descriptive analytics of the COVID-19 pandemic in a middle-income country with forward-looking insights	Artigo de periódico	2024
A dimensionality reduction approach for convolutional neural networks	Artigo de periódico	2023
A language-independent approach to the extraction of dependencies between source code entities	Artigo de periódico	2014
A language-independent approach to the extraction of dependencies between source code entities	Artigo de periódico	2014
A large scale study on how developers discuss code smells and anti-pattern in Stack Exchange sites	Artigo de periódico	2020
A large-scale study on the usage of testing patterns that address maintainability attributes: patterns for ease of modification, diagnoses, and comprehension	Conferência	2017
A longitudinal exploratory study on code smells in server side web applications	Artigo de periódico	2021
A longitudinal study on the temporal validity of software samples	Artigo de periódico	2024
A Multiple-Attribute Decision Making-based approach for smart city rankings design	Artigo de periódico	2019
A network analysis of official Twitter accounts during the West Virginia water crisis	Artigo de periódico	2016
A network analysis of official Twitter accounts during the West Virginia water crisis	Artigo de periódico	2016
A rapid assessment of the status, trends and challenges in small-scale commercial sardine fisheries in the Sulu Archipelago, southern Philippines	Artigo de periódico	2024
A review-based comparative study of bad smell detection tools	Conferência	2016
A Safari for Deviating GoF Pattern Definitions and Examples on the Web	Conferência	2023
A Stitch in Time: Supporting Android Developers in Writing Secure Code	Conferência	2017
A study examining relationships between micro patterns and security vulnerabilities	Artigo de periódico	2019
